

An Introduction to Using GIS in Marine Biology: Supplementary Workbook Four: Investigating Home Ranges Of Individual Animals (Paperback)

Filesize: 8.83 MB

Reviews

An exceptional ebook along with the typeface employed was intriguing to see. It really is simplistic but surprises within the fifty percent of the ebook. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Brian Miller)

AN INTRODUCTION TO USING GIS IN MARINE BIOLOGY: SUPPLEMENTARY WORKBOOK FOUR: INVESTIGATING HOME RANGES OF INDIVIDUAL ANIMALS (PAPERBACK)

To read **An Introduction to Using GIS in Marine Biology: Supplementary Workbook Four: Investigating Home Ranges Of Individual Animals (Paperback)** PDF, you should follow the web link listed below and save the document or gain access to other information which are in conjunction with **AN INTRODUCTION TO USING GIS IN MARINE BIOLOGY: SUPPLEMENTARY WORKBOOK FOUR: INVESTIGATING HOME RANGES OF INDIVIDUAL ANIMALS (PAPERBACK)** book.

Pictish Beast Publications, United Kingdom, 2014. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.This book is the fourth companion volume to *An Introduction To Using GIS In Marine Biology* . It is designed to augment the information on using GIS in marine biology provided in that book, and, indeed, to be used alongside it rather than to be used independently as a stand-alone volume. Therefore, this book will be of most interest to those who have already read *An Introduction To Using GIS In Marine Biology* . This book consists of five exercises covering the practical use of GIS in marine biology using ERSI's ArcGIS(r) 10.2 GIS software. These exercises are based around using GIS to investigate the home ranges of individual animals. They range from creating minimum convex polygons (MCPs) and kernel density estimates (KDEs) to comparing the home ranges of different individuals in a population. The exercises are designed to be followed in the order they are presented, and work with a specific data set which can be downloaded for free. Working through these five exercises will help the novice GIS user obtain experience in investigating the home ranges of individual animals in a GIS-based environment, and so develop their GIS skills. Unlike most other GIS tutorials, this information is specifically presented in a marine biological context and all the exercises use real data from a marine biological study. Therefore, these exercises are more likely to provide the kind of experience in using GIS that marine biologists will find useful and applicable to their own research. These exercises are presented in the same easy-to-follow flow diagram-based format first introduced in the How To. section of *An Introduction To Using GIS In Marine Biology* . They are...
