FROM HOT LATTICE QCD TO COLD QUARK STARS

Südwestdeutscher Verlag Für Hochschulschriften AG Co. KG Jul 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x9 mm. Neuware - The work connects the fields of Elementary Particle-, Collider- and Astrophysics. A thermodynamic model of the quark-gluon plasma using quasiparticle degrees of freedom based on the hard thermal loop self-energies is introduced. It provides a link between an established quasiparticle model - following from the former using a series of approximations - and QCD - from which the former is derived using...

Reviews

This publication could be worth a read through, and far better than other. This is certainly for all those who statt there was not a worth reading through. You may like just how the author compose this publication.

-- **Dr. Kayley Kovacek PhD**

It in a of my personal favorite book. This is certainly for anyone who statt there had not been a worth studying. I found out this ebook from my i and dad advised this pdf to learn.

-- **Delphine Lebsack**

This ebook might be worth a read, and superior to other. It is probably the most remarkable book i have got read. Its been designed in an remarkably straightforward way and it is merely soon after i finished reading this publication where really modified me, alter the way i really believe.
