

Combat Identification Systems: Changes Needed in Management Plans and Structure: Nsiad-95-153

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 42 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. GAO reviewed the Armys and Navys development of combat identification systems to reduce the occurrences of friendly fire incidents, focusing on the services management plans and structures for the systems development and integration. GAO found that: (1) the Army and Navy do not have a cohesive management plan and structure for the development of their cooperative combat identification systems; (2) the lack of cohesiveness reflects the division in the services responsibilities for developing systems for different combat modes; (3) the two services have based their system development plans on different technologies and have not fully addressed how and at what cost these systems will be integrated; (4) the lack of a cohesive management structure could lead to development and deployment delays by allowing the services to prioritize their efforts differently; (5) the Navy has developed a cost and operational effectiveness analysis (COEA) for its system, but the Army is just beginning to develop its COEA; (6) the development of separate COEA risks wasting resources because of duplication and delays in system development and deployment and does not address the need for...
