

Exploring Pilots Experiences of Integrating Technologically Advanced Aircraft Within General Aviation (Paperback)

By Calvin Nobles Ph D

Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.A must read for researchers and practitioners with a personal and professional desire to improve general aviation safety. As a general aviation enthusiast and researcher, the author wants to ensure general aviation remains a viable and flourishing sector of the aviation industry. This book highlights a growing phenomenon of integrating innovative technologies in general aviation. The goal is to ensure technologists, researchers and the aviation industry ameliorate collaborative endeavors to counterbalance the pros and cons of integrating technologies in general aviation to decrease the number of accidents and fatalities. Technologically advanced aircraft are fascinating and pilots with the proper training are able to capitalize on flying advanced aircraft with comparable technologies that are analogous to commercial and military aircraft. This book expounds on general aviation pilots concerns with integrating glass cockpits in general aviation. The research within corroborates a previous study that technologically advanced aircraft have not improved general aviation safety. At issue are training, safety, proficiency and competency, and aeronautical decision-making implications. General aviation remains under researched when compared to commercial and military aviation sectors. This book...
